**DETAILED ACTION**

1. This action is in response to papers filed on November 24, 2004.

***Election/Restrictions***

2. Applicant's election of claims 5-15 in the reply filed on 11/24/2004 is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)).

3. Claims 5-15 have been elected.
4. Claims 1-4 and 16-31 are non-elected.
5. Claims 5-15 are pending.
6. Claims 5-15 are rejected.

***Claim Rejections - 35 USC § 112***

7. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

8. Claims 5-15 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the

Art Unit: 3629

invention. Claim 5 states "teaching" device, the specification does not support the requirement of enabling someone to know teaching the device is done. How is it taught? Who teaches it? What is it taught? Claim 5 also recites "deriving" a comparison table. How is the table derived? Where is it derived from? Claim 5 further recites "determining a maturity level". It tells what might be used to determine maturity level but not how those elements are used to determine the level. Claim 7 recites a limitation "weighted comparisons". The specification discusses a "weighted calculation" but does not identify what that calculation. The specification is insufficient for one of ordinary skill in the art to make and/or use at the time of invention.

9. Prior art is not being applied to the above claims because the specification of originally application filed on May 5, 2001 does not enable the scope of the claims to be determined therefore are unsearchable.
